DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by European Patent Application 0045658 (EP'658). EP'658 teaches an arrangement in a gas supply system for a tuyere in a metallurgical furnace, as shown in the embodiment of figure 1 for example, which can be employed for a plurality of tuyeres, where the gas flow is reduced or interrupted to some extent through the use of transducers (4) thereby showing all aspects of the above claims since the use of the device for reducing the gas supply by any particular value at any particular frequency are limitations dealing with the manner or method of use of the claimed apparatus and cannot be relied upon to fairly further limit claims to the apparatus itself. See MPEP 2114 and 2115.

Allowable Subject Matter

Claim 7 is allowed at least because none of the cited or applied prior art shows or fairly suggest the high frequency periodic pulsing of the gas supply.

Response to Arguments

Applicant's arguments filed on 4/1/2008 have been fully considered but they are not persuasive. Applicant's argument that EP'658 does not teach a restrictor which can actively reduce or interrupt the gas supply is not persuasive because as stated on page 3 of EP'658 for example, the tuyere flow rates can be controlled. As written the inflow restrictor of the instant

claims can be met by any device which modifies the flow of gas through the tuyere, including a gas valve for shutting off or opening the gas supply as disclosed by EP'658.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
